RE: Architectural Reference

Dear Mr. Ramadan:

I am writing this letter on behalf of Millennium Homes to acknowledge the outstanding work of Lessard Group Inc (Lessard).

We hired Lessard in June of 2005, to conduct architectural services, including design, contract document development, site supervision and project management for our Equinox 360 project in East Rutherford, New Jersey. Lessard not only integrated our ideas in an economical and efficient way, but discussed and implemented many of their own innovative, resource-efficient concepts.

Lessard consistently went above and beyond the call of duty. They provided us with multiple solutions for technical issues and product selections. They produced attractive visual materials, such as perspective sketches that were used in the marketing of our project. Salaheddin and his team always took our requests and concerns seriously and responded promptly and effectively, often times predicting our needs and having answers before we knew the question. His team's calm, friendly, relaxed manner was accompanied by creative energy and enthusiasm. This team has produced a great product, on time and with efficiency rare in the design world today. Not only did Lessard work cooperatively with our firm, but they fostered good relationships with other consultants, general contractors and subcontractors. Lessard is a pleasure to work with.

On behalf of Millennium Homes, I highly recommend your team and services.

Sincerely,

R. James Puleo
V.P. of Construction
